

LiFi Onboard

Cabin Network

- Connectivity using built-in cabin lighting
- Single LiFi receiver provides connectivity for multiple IFEs and seat rows
- Effortless out-of-the-box LiFi connectivity for personal devices (Android, iOS or others)

Backhaul Network

- Wireless connectivity across the cabin
- Eliminate cable clutter throughout the aircraft
- Less network maintenance costs and weight reduction

Gate Link

- High-speed wireless content delivery
- Automatic content delivery upon aircraft parking
- Reduced maintenance costs and cabling

Get Ready for Revolutionary Cabin Technology!

Embark on a journey into the world of high-speed wireless connectivity in the cabin with our cutting-edge LiFi solutions. We offer the perfect momentum to propel you into a seamless and connected future.
